## A corrigendum on

### Exome Sequencing Reveals Primary Immunodeficiencies in Children with Community-Acquired *Pseudomonas aeruginosa* Sepsis

by Asgari S, McLaren PJ, Peake J, Wong M, Wong R, Bartha I, et al. *Front Immunol* (2016) 7:357. doi:10.3389/fimmu.2016.00357

There was a mistake in the gene name reference to MKL1 on page 6, right column, last sentence of 2nd paragraph. The sentences says: "This was recently illustrated by Record et al., who used exome sequencing in a girl with *P. aeruginosa* sepsis and found a homozygous LoF mutation in MAP3K9 (MKL1), a gene that was not known to cause PID (22)." The correct form of the sentence should be "This was recently illustrated by Record et al., who used exome sequencing in a girl with *P. aeruginosa* sepsis and found a homozygous LoF mutation in MKL1, a gene that was not known to cause PID (22)."

The authors apologize for the mistake.

This error does not change the scientific conclusions of the article in any way.

**Conflict of Interest Statement:** The authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.
