Cultural education addresses the diversity of Aboriginal and Torres Strait Islander peoples' cultures, experiences, histories and geographical locations. It provides medical health professionals and students with the abilities, skills and knowledge to deliver quality patient care in Aboriginal and Torres Strait Islander health.

Cultural mentoring refers to a developmental relationship between an Aboriginal and Torres Strait Islander community member and a GP Registrar undertaking the optional experiential training at an Aboriginal and Torres Strait Islander Health Training Post. This relationship is driven by the Aboriginal and Torres Strait Islander community's need for culturally safe General Practice, and the registrar's need to receive that knowledge and experience in a mutually supportive manner.
