

Andrew Taylor
Research Focussed Principal Fellow
College of Indigenous Futures, Arts and Society

Research interests

Andrew Taylor's research focuses on understanding the causes and consequences of population changes in the Northern Territory of Australia and in northern and sparsely populated areas of developed nations more broadly. With expert knowledge of relevant data, he is particularly interested in relationships between changing populations, economies and communities. His aim is to provide evidence-based advice to policy makers, NGOs and other practitioners of the north for the benefit of our communities and our diverse societies. Andrew teaches the masters subject "Topics in Human Geography: A remote perspective" as part of CDU's Master of Public Policy.

Employment

Associate Professor

Research Focussed Principal Fellow
College of Indigenous Futures, Arts and Society
